Notice of Allowability	10/600,594	OKUBO ET AL.
	Examiner	Art Unit
	Patricia T Nguyen	2817
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. This communication is responsive to		
2. The allowed claim(s) is/are 18.		
3. X The drawings filed on 23 June 2003 are accepted by the Examiner.		
 4. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some* c) None of the: 1. Certified copies of the priority documents have been received. 		
2. Certified copies of the priority documents have been received in Application No		
3. Copies of the certified copies of the priority documents have been received in this national stage application from the		
International Bureau (PCT Rule 17.2(a)).		
* Certified copies not received:		
Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application. THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.		
5. A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.		
6. CORRECTED DRAWINGS (as "replacement sheets") must be submitted.		
(a) ☐ including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached		
1) hereto or 2) to Paper No./Mail Date		
(b) ☐ including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No./Mail Date		
ldentifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet. Replacement sheet(s) should be labeled as such in the header according to 37 CFR 1.121(d).		
7. DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.		
Attachment(c)		
Attachment(s) 1. ☑ Notice of References Cited (PTO-892)	5. Notice of Informal F	Patent Application (PTO-152)
2. Notice of Draftperson's Patent Drawing Review (PTO-948)	6. Interview Summary	
3. Information Disclosure Statements (PTO-1449 or PTO/SB/	Paper No./Mail Da 08), 7. ⊠ Examiner's Amend	ite ment/Comment
Paper No./Mail Date	8. X Examiner's Statem	ent of Reasons for Allowance
of Biological Material	9. Other	

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 1, line 12; claim 9, line 13; claim 11, line 14; claim 13, line 9; claim 17, line 10, claim 18, line 11, "the mode of changing the signal" has been changed to -- a mode of changing the signal --.

In claim 1, lines 17 and 18; claim 9, lines18 and 19; claim 11, lines 19 and 20; claim 17, line 12; claim 18, line 13, "a mode of changing the signal" has been changed to -- the mode of changing the signal --.

In claim 13, line 17, 18, 19, "signal <u>charge</u> means" has been changed to -- signal change means --.

The following is an examiner's statement of reasons for allowance: prior art, U.S. Patent # 6,388,518 B1 of Miyatani, does not teach nor render obvious a distortion compensator that compensates for distortion arising in an amplifier that amplifies a signal that has, in combination with other limitations, signal level change direction detection means that detects whether the direction of change in the level of the signal subject to amplification by the amplifier is the positive direction or the negative direction, and signal change control means that stores the correspondence between the signal level and a mode of changing the signal for distortion compensation in the case that

Application/Control Number: 10/600,594 Page 3

Art Unit: 2817

the direction of change in the signal level is the positive direction, and also stores the correspondence between the signal level and the mode of changing the signal for distortion compensation in the case that the direction of change in the signal level is the negative direction, and based on the content thus stored, controls the signal change means such that it changes the signal subject to amplification by the amplifier in the mode of changing the signal corresponding to the direction of change in the signal level detected by the signal level change direction detection means and the signal level detected by the signal level detection means; nor does it have a signal change control content updating means that updates the content of the correspondence between the signal level and mode of changing the signal for distortion compensation stored by the signal level change control means so that the distortion contained in the signal after being amplified by the amplifier is reduced.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 6,388,518 B1, #3,644,830, # 3,731,199, # 6,201,841 B1 contain some limitations of the claimed invention.
